

ALUPROFILUM SPACERS

Tiling is all about style and design. A well installed project is all about precision which means Uniformity of the Tiles and Equal Grout Lines. Spacers prevent the tiles getting too close to each other which might cause chipping on the edges. One can easily get this precision and increased durability with Engineered AluProfilium Spacers.

Varying from 1mm to 10mm, AluProfilium Produces one of the most diverse Tile Spacer Models. Over 25 models including Standard Spacers, Grooved Spacer, Removable Spacer and T Shape Spacers.

AluProfilium Recommends;

- Usage of 2mm or 3mm for walls, 3mm-5mm for floors.
- Always use a laser grid before starting and during the work
- Start Tiling from the center of the environment which will be tiled. You'll be able to see the patterns and the work much better.
- Use Spacers horizontally in the joining corners and vertically along the sides.
- Use T Spacers in the areas like end walls or Rectangular Tiles.
- After the drying time, if not Using Leave – In Spacers, remove it using a nipper
- Use small spacers for small rooms/areas, likewise use larger spacers for large rooms/areas

How Many Tile Spacers do I need?

TILE SPACERS NEEDED PER SQ. YD./M2 ACCORDING TO CERAMIC FORMAT										
	Inch cm	4x4" (10x10)	6x6" (15x15)	8x8" (20x20)	12x12" (30x30)	16x16" (40x40)	18x18" (45x45)	20x20" (50x50)	24x12" (60x30)	24x24" (60x60)
X	Sq.Yd. m²	89 (106)	41 (49)	24 (29)	13 (15)	7 (8)	6 (7)	5 (6)	7 (8)	5 (6)
T	Sq.Yd. m²	178 (212)	82 (98)	48 (58)	26 (30)	14 (16)	12 (14)	10 (12)	14 (16)	10 (12)

Product Code	Product Name	Dimensions (LXW)	Qty/Bag (PCS)
ALPF001	1 mm TileSpacer	20X20mm	250/500
ALPF002	1,5 mm TileSpacer	25X25mm	250/500
ALPF003	2 mm TileSpacer	27X27mm	250/500
ALPF004	2,5 mm TileSpacer	27X27mm	250/500
