ALUPROFILIUM

ABOUT US

AluProfilium was born from a simple idea:

to do things differently in a space where sameness had become the norm.

We're a team of people who care deeply about the small things – the clean lines where tile meets wall, the feel of a brushed aluminum edge under your fingers, the way a profile can disappear or stand out, depending on how it's used. That's where our story begins.

What sets us apart isn't just the quality of our aluminum profiles – although we take pride in that too. It's the way we work: hands-on, detail-driven, and always close to the people who use our products. We listen. We adjust. And we grow with every project we're part of.

Based in **Türkiye**, we've built AluProfilium around the values of precision, trust, and accessibility. We're proud to be the only company in the country offering such high-quality profiles at reduced prices – not by cutting corners, but by rethinking the way things are done.

From architects to contractors, from boutique designers to major developers, we serve those who see value in the finer details. If you're one of them, you're in good company.

At AluProfilium, we don't just make profiles. We help shape the spaces that shape people's lives.

TABLE OF CONTENT
